Executive dashboard

HealthConnect Rwanda | Supplied 2026 scenario | AnalystLab Africa

Registered patients	Available appointments	Payment records	Mean feedback
20,000	**5,000**	**RWF 8.389bn**	**2.99 / 5**

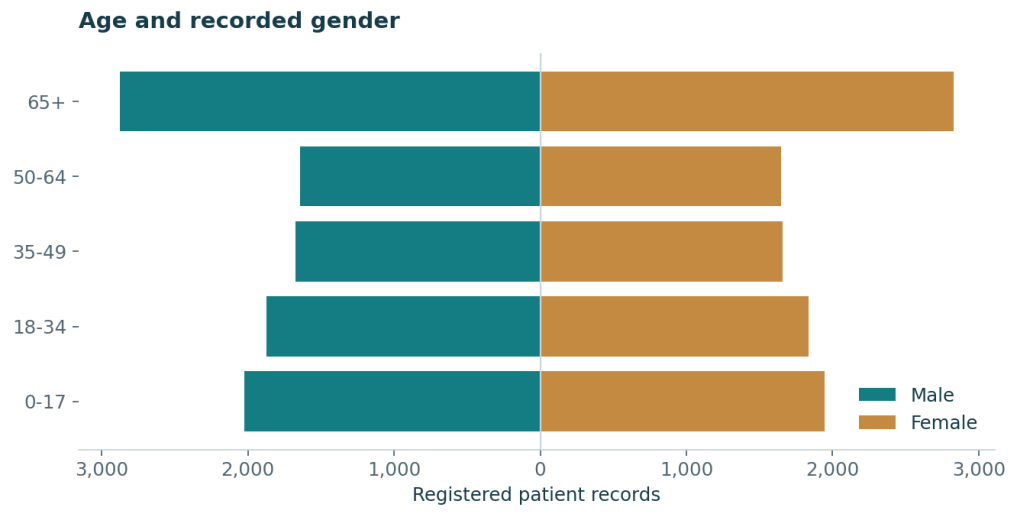

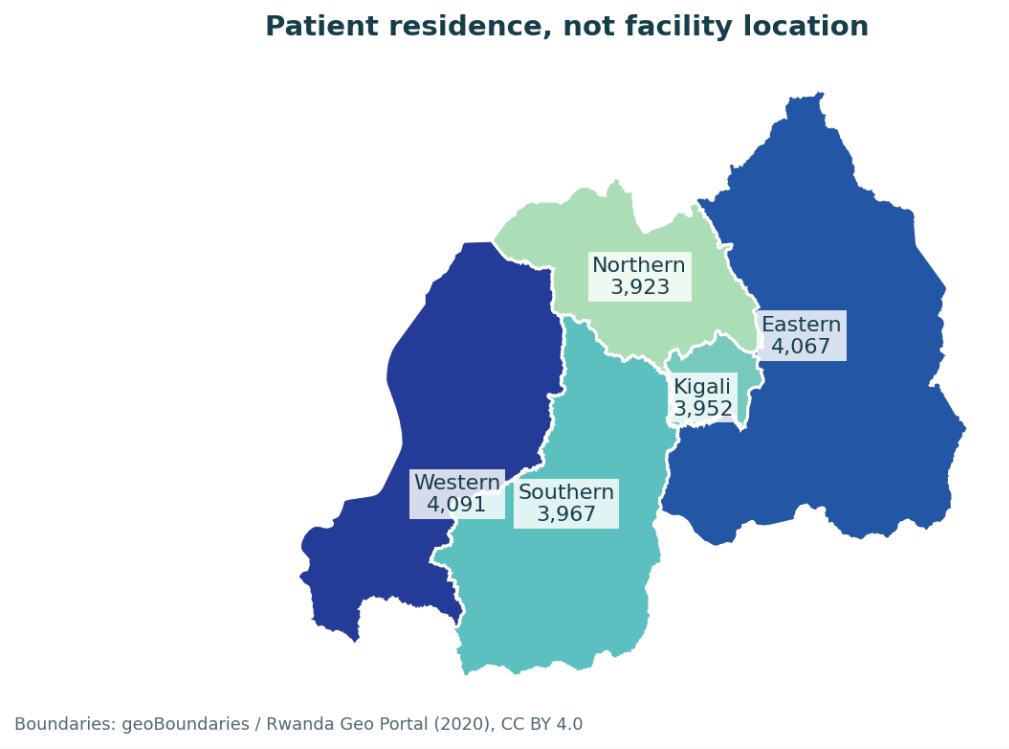

Annual supplied 2026 scenario. Only 8.33% of bills link to the available appointments. Full financial totals and linked facility comparisons have different coverage.

Patient analytics

HealthConnect Rwanda | Supplied 2026 scenario | AnalystLab Africa

Patients with visits	Repeat-visit patients	Recorded mean age	Insurance code present
4,443	**510**	**45.03 years**	**100%**

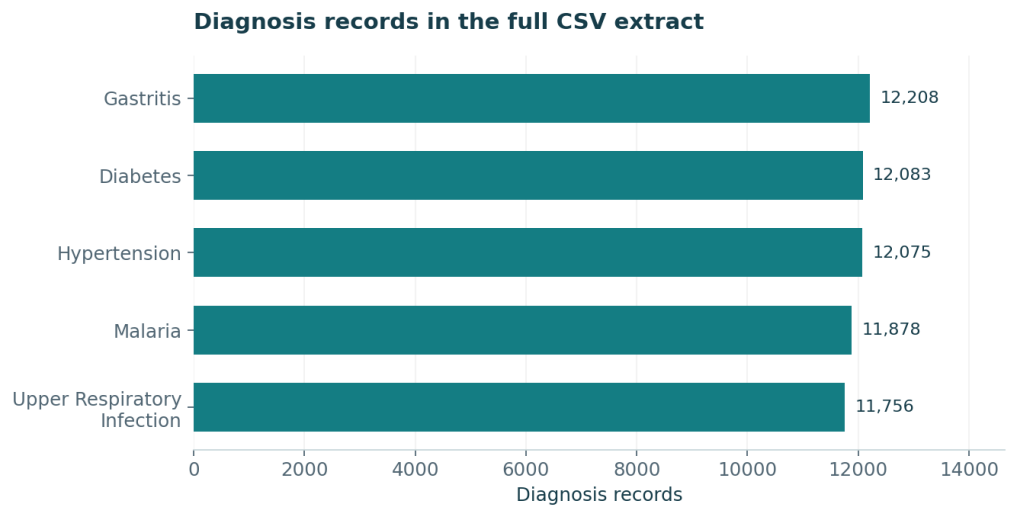

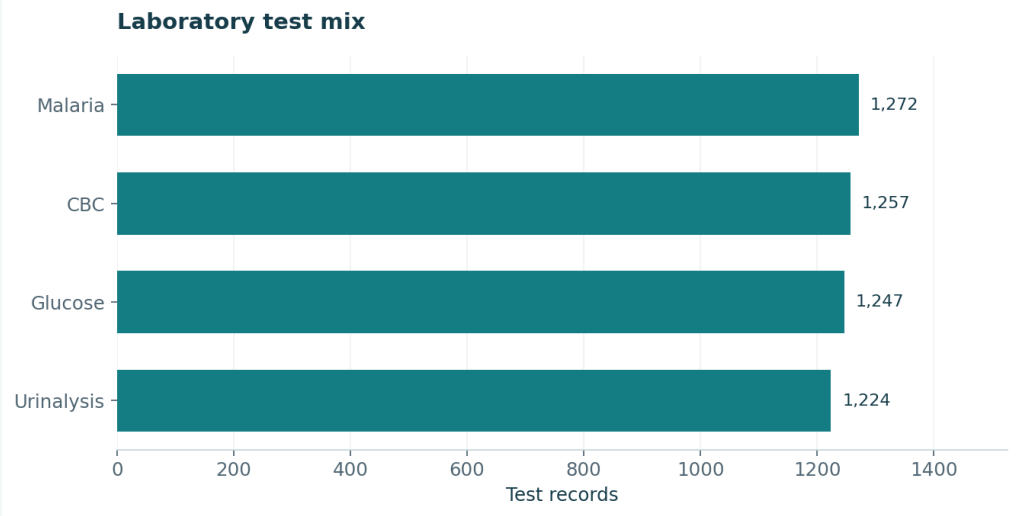

The patient master contains 20,000 records. Maps show province of patient residence. Insurance-code presence does not verify coverage or policy validity.

Clinical analytics

HealthConnect Rwanda | Supplied 2026 scenario | AnalystLab Africa

Diagnosis records	Laboratory tests	Prescriptions	Mean admission stay
60,000	**5,000**	**5,000**	**5.49 days**

Global counts retain unmatched clinical records. Facility and date comparisons require a valid appointment link. Clinical readmission rates and causal conclusions are not supported.
